

PISTON ROD PACKING

Reliability under demanding operating conditions

- Gland sealing housings with forced liquid cooling and supporting buffer gas
- Minimal friction
- Optimal performance achieved through the proper selection of high-tech piston rod ring sets and accurately calculated thermal clearances

Broad manufacture capabilities

- Varied selection of special materials
- Precision machining on CNC machines
- Grinding and fitting-in of all sealed surfaces
- Compliance with current API 618 standards

up to
1800 rpm

supporting
buffer gas

up to 30 MPa
differential
pressure

H₂O
cooled and uncooled

PEEK NiMo DLC API 618
